Day-09 Assignment

Topics Covered:

- JavaScript Events
- Bootstrap Basics

Assignment: Build a Personal Portfolio Page

Instructions:

1. **Page Structure:**

   - Create an HTML file named `portfolio.html`.
   - Use Bootstrap's grid system to structure the page into sections:
     - **Header:** Include a navigation bar with links to "About Me," "Projects," and "Contact."
     - **Main Content:**
       - About Me: Add a photo of yourself and a short introduction.
       - Projects: Use Bootstrap cards to showcase 3 sample projects with images, titles, and descriptions.
   - **Footer:** Include your contact information (email and social media links).

2. **Add JavaScript Functionality:**

   - **Interactive Navigation:**
     - Add event listeners to the navigation links.
     - When a link is clicked, scroll smoothly to the corresponding section.
   - **Dynamic Project Section:**
     - Include a button to toggle the visibility of the project descriptions.
     - Example: "Show/Hide Project Details."

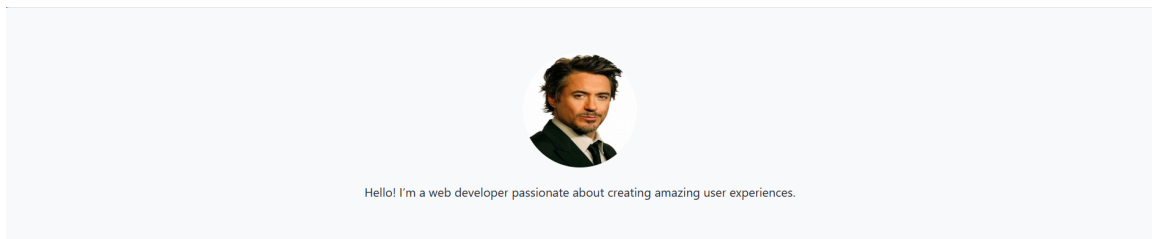

Example Output:

### Header:

- A Bootstrap navbar with links like:

My Portfolio	About Me Projects Contact

Main Content:

- **About Me Section:**

Hello! I'm a web developer passionate about creating amazing user experiences.

- **Projects Section:**

Create 3 cards using Bootstrap:

To-do list
Description of Project 1.

Portfolio
Description of Project 1.

calculator
Description of Project 1.

Footer:

- Add a footer with social media icons:

Email: example@example.com

Follow me: Twitter | LinkedIn | GitHub

Submission Guidelines:

1. Save your HTML, CSS, and JS files in a folder named `Day9_Assignment`.

2. Ensure all links, images, and JavaScript functionalities work correctly.

3. Submit the folder for review or upload it to GitHub with screenshots.
